

WOOD FIREPLACES

Wood-burning Fireplaces have come a long way from the traditional brick-by-brick variety. Today's factory-built fireplaces are economical, easily installed and offer numerous features not shared by masonry fireplaces.

WINTERWARM

WARMMAJIC

TECHNICAL Q & A

Q: How can I install a fireplace and not take up any additional room inside my home?

A: Most fireplaces are installed into a chase. A chase is a structure built on the outside of the home where the fireplace sits, thus allowing the front face of the fireplace to be flush with the inside wall of the room.

Q: Are factory-built fireplaces clean-burning?

A: Since open fireplaces are not "controlled combustion" appliances, they burn their fuel rapidly, with little excess smoke or pollutants. That is why EPA regulations specifically exempt most factory-built fireplaces from its emissions standards.

Nonetheless, Vermont Castings wood fireplaces are industry leaders in efficiency and clean burning. In particular the WinterWarm Fireplace System boasts efficiency levels (over 78%) that match even the best wood stoves. The WarmMajic is a more conventional factory-built fireplace and is exempt from EPA regulations.

WinterWarm Fireplace System (WinterWarm Large + Energy Cabinet)

Standard Features

- Large fireviewing area with clean, durable, ceramic glass
- Easy swing-out ash pan with cover
- Rheostat controlled twin fans for heat circulation
- Standard sparkscreen for open fireviewing
- Solid, durable cast-iron construction
- Solid brass trim around door
- Thermostatic control for steady, even heat

Optional Accessories

- Outside air kit
- Powerful 260 CFM cabinet blower for increased heating power and circulation
- Surround panels to compliment a variety of facing materials for a neat, finished appearance

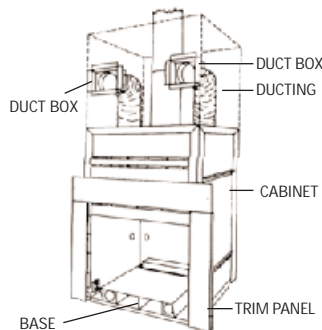

Specifications:

Burn Time:	Up to 9 hours
Heating Capacity:	750 – 1,500 sq. ft.
Max. Heat Output:	50,000 BTU/hr
Efficiency Rating:	78.3%
EPA Emissions Rating:	2.1 grams/hr
Chimney:	8" High
	Temperature

Cabinet Dimensions

Height:	59 1/2"
Width:	39 1/2"
Depth:	28 1/2"
Visible Front:	41" W x 34 1/2"

Available Colors: Porcelain enamel colors: Sand, Midnight Black

WINTERWARM "ENERGY CABINET"

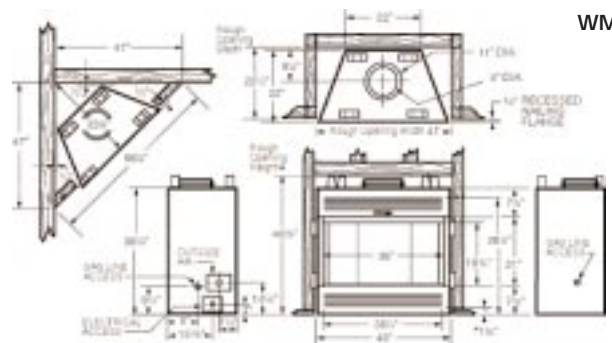

WarmMajic

Standard Features

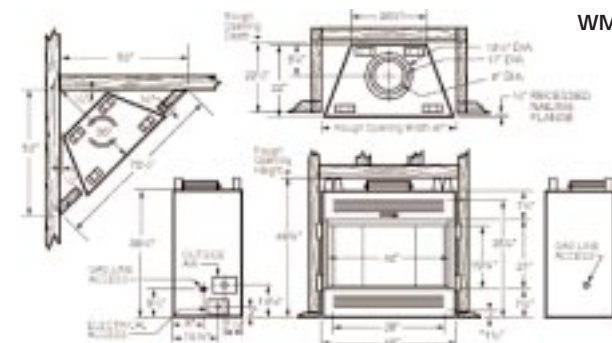

- Large 36"/42" Radiant Firebox
- Full Refractory Lined Firebox, Sides, Back and Hearth
- 160 CFM Forced Air System
- Factory installed Outside Air System
- Fully Insulated Construction helps reduce cold air filtration
